

FreeWheel

All Terrain Wheelchair Attachment

The FreeWheel is a single large pneumatic castor that after attaching to your footplate, allows you to easily cross rough ground. With the FreeWheel your wheelchair casters are lifted off the ground, turning your chair into a 3-wheeler, so you simply roll over any obstacle: curbs, dirt trails, grass, gravel, snow, and sand. The FreeWheel wheelchair attachment fits both rigid frame and folding frame.

Strolling, exercising, hiking, or just checking the mailbox, is so much easier with the FreeWheel. Grass, curbs, and rough roads can be easily navigated to help you in your quest for independence.

Frame/Fork

Made from strong, aircraft quality aluminium. The overall unique curved design adds strength and means there are no sharp edges to catch on anyone or anything.

Clamp

The precisely engineered vice like connection allows you to confidentially attach your FreeWheel for a secure fit and excellent handling.

Wheel

The large 12.5" pneumatic front wheel has less resistance than small casters and makes it easier to roll on any surface, whether you are alone, or someone is helping you.

Detent

This mechanism keeps the front wheel straight to improve stability and handling. By applying slight pressure, it will release, allowing you to quickly and easily turn in any direction.

Perch

Attach the included perch onto your crossbar behind your seat back and clamp your FreeWheel onto it when you need to stow it. This allows you to have your FreeWheel literally at your finger tips and also, keeps it out of the way when you don't.

The FreeWheel is lightweight at only 2.35kg.

Recommended weight limit of 126.8kg for the FreeWheel and 113kg with the adaptor for the folding wheelchair. Note. Not suitable for angle adjustable or swing away footrests.
